Dear Sir/Madam,

---

Hiring manager,  
SCANBID.

---

By means of this letter, I would like to inquire about the possibility of filling an outstanding Software Engineer at SCANBID. My preference would be to fill the position of Software engineer/ Mobile App Engineer.

I recently completed my BSc. Computer Science and Electronics degree at Wayamba University of Sri Lanka. Also, I did my one of research projects as a mobile application by using flutter. I would like to use my skills with your organization, to make optimal use of my acquired knowledge.

I just finished my internship as an intern software engineer. Especially I engaged with the Flutter framework to implement the Mobile application. I did the given tasks individually. Hence I believe that self-motivation and discipline really helped to end the internship successfully.

I am someone who is passionate about software development, software engineering, and web development. I would like to put these characteristics to use within your organization. Given my education at Wayamba University of Sri Lanka, the components that were discussed during my studies closely match the skills required for this position.

I would like to further explain my motivation for the position of Software engineer during a personal meeting. You can reach me either by phone via 0718933579 or by email via chathuri537@gmail.com.

Thank you for your consideration. I look forward to hearing from you.

Sincerely,  
Chathuri Sathya
