Dear Sir/Madam,

---

Hiring manager,  
Bending Spoons.

---

By means of this letter, I would like to inquire about the possibility of becoming an outstanding Software Engineer at Bending Spoons. My preference would be to fill the position of Software engineer.

I recently completed my BSc. Computer Science and Electronics degree at Wayamba University of Sri Lanka. Also, I did my one of research projects as a mobile application by using flutter. I would like to use my skills with your organization, to make optimal use of my acquired knowledge.

I just finished my internship as an intern software engineer. Especially I engaged with the Flutter framework to implement the Mobile application. I did the given tasks individually. Hence I believe that self-motivation and discipline really helped to end the internship successfully.

I am someone who is passionate about software development, software engineering and flutter development. I would like to put these characteristics to use within your organization. The components that were discussed during my studies closely match the skills required for this position.

I would like to further explain my motivation for the position of Software Engineer during a personal meeting. You can reach me either by phone via 0718933579 or by email via chathuri537@gmail.com.

Thank you for your consideration. I look forward to hearing from you.

Sincerely,  
Chathuri Sathya
